Outlook

Financial Performance (Consolidated)

- ❑ The consolidated revenue grew by 4.4% in 1Q25, mainly came from continuous store expansion and increasing PSD-Sales of 7-ELEVEN Taiwan, 7-ELEVEN Philippines, COSMED and others.
- ❑ The stable growth of gross profit and gross margin was raised by optimized product mix and economic scales. Operating expenses increased due to higher external operating costs (such as electricity and labor), and continued store expansion, logistics investments and digital development. All aimed at reinforcing our foundation for long-term growth, led to a 0.9% decline in operating profit and a 1.0% drop in net income.

Unit : \$NT bn

Financial Performance (Parent Company)

- ❑ The revenue increased by 5.2% in 1Q25, 7-ELEVEN Taiwan continued to expand store, primarily driven by growth of fresh food, CITY CAFE and beverage.
- ❑ Revenue growth drove an increase in gross profit, while operating expenses rose due to higher external operating costs (such as electricity and labor), as well as strategic store expansion and long-term investments in logistics and digital. To strengthen our market leadership and future growth momentum, led to a 1.7% decline in net income.
